ERGO STAND

ERGO STAND

The Ergo Stand is an innovative solution designed to enhance workplace ergonomics, particularly in factory settings where employees often face the challenge of maintaining comfort and productivity. With its intuitive design, the Ergo Stand allows workers to easily adjust the platform to their preferred height, eliminating the clutter of multiple stands and optimizing workspace efficiency. By simply lifting the platform to the desired elevation and securing it in place, employees can focus on their tasks without the distraction of uncomfortable or awkward positioning.

ADVANTAGES

Constructed from stainless steel with an open frame design, the Ergo Stand is built to last while adhering to stringent food safety standards. This makes it an ideal choice for environments where hygiene is paramount. With a robust load capacity of up to 500 pounds at maximum elevation, it is capable of supporting a variety of equipment and materials, making it versatile for different factory applications. The lightweight yet durable structure ensures that the stand can be easily moved and adjusted as needed, promoting a dynamic work environment.

The standard deck dimensions of 24 inches wide by 20 inches deep provide ample surface area for tools and materials, while the variable height adjustment capability - from floor level to 11.75 inches - accommodates a range of user preferences and tasks.

Additionally, the option for slip knot decking and custom units allows for further personalization to meet specific operational needs.

Overall, the Ergo Stand is a valuable asset in any factory, promoting ergonomic best practices that lead to increased employee comfort and productivity.

STANDARD OPTIONS

- Stainless Steel, open frame construction
- Meets food safety standards
- 500lb load with step at max elevation
- Lightweight and high durability
- Variable height adjustment from Floor Level to 11.75 inches
- Standard deck 24" wide x 20" deep

ADDITIONAL OPTIONS

- Slip knot Decking
- Custom units available
